JOURNAL OF RESEARCH IN SCIENCE TEACHING

Contents

Volume 21, 1984

Issue 1, January

- Identifying Mediating Factors of Moral Reasoning in Science Education: *Dana L. Zeidler and Larry E. Schafer* 1
- A Longitudinal Study of the Supply and Demand for Physics and Chemistry Teachers in Kansas: *William S. LaShier, Jr. and Wan Yung Ryoo* 17
- A Qualitative Approach to the Study of a Teacher's Beliefs: *Hugh Munby* 27
- The Effects of Computer Use in Science and Mathematics Education Upon the Computer Literacy of Preservice Elementary Teachers: *Michael T. Battista and Gerald H. Krockover* 39
- Science Choices and Preferences of Middle and Secondary School Students in Utah: *J. Hugh Baird, Reuven Lazarowitz, and Verl Allman* 47
- The Relationship Among Teacher Classroom Management, Behavior, Student Engagement, and Student Achievement of Middle and High School Science Students of Varying Aptitude: *John R. McGarity, Jr. and David P. Butts* 55
- The Effectiveness of Laboratory Photomicrography for Studying Microbiology in Nigerian Secondary Schools: *Anthony Ali* 63
- Individual Differences: A Third Component in Problem-Solving Instruction: *Royce R. Ronning, Donald McCurdy, and Ruth Ballinger* 71
- The Effects of Instructional Organization and Locus of Control Orientation on Meaningful Learning in High School Biology Students: *Jacqueline D. Sherris and Jane Butler Kahle* 83
- A Study of Gender Effects in the Science and Mathematics Course-Taking Behavior of a Group of Students Who Graduated from College in the Late 1970s: *George E. DeBoer* 95

Comments and Criticism

- A Problem of Multiple Significance Tests: *Ron Good* 105
- Comments on the Use of Multiple Regression Analyses: *Peter F. W. Preece* 107

Issue 2, February

- Attitude Measurement: Judging the Emotional Intensity of Likert-Type Science Attitude Statements: *Robert L. Shrigley and Thomas R. Koballa, Jr.* 111
- Proportional Reasoning and the Linguistic Abilities Required for Hypothetico–Deductive Reasoning: *Anton E. Lawson, David I. Lawson, and Chester A. Lawson* 119

- Cognitive Style and the Acquisition and Transfer of the Ability to Control Variables: *Barbara M. Strawitz* 133
- Differential Effects of Verbal Aptitude and Study Questions on Comprehension of Science Concepts: *William G. Holliday, Harold G. Whittaker, and Kenneth D. Loose* 143
- Sex, Grade, and Course Differences in Attitudes that are Related to Cognitive Performance in Secondary Science: *James Levin and H. Seymour Fowler* 151
- Teacher Decision Making: The Case of Prairie High: *Glen S. Aikenhead* 167
- Validation of the *Test of Energy Concepts and Values* for High School: *Constance C. Holden and Lloyd H. Barrow* 187
- Research Data Necessary for Meaningful Review of Grade Ten High School Genetics Curricula: *Mark W. Hackling and David F. Treagust* 197
- Determinants of Implementation of an Elementary Science Program: *Robert K. Crocker* .. 211
- Problem-Solving Skills of High School Chemistry Students: *Dorothy L. Gabel, Robert D. Sherwood, and Larry Enochs* 221

Issue 3, March

Research Forum

- A Research Methodology for Studying How People Think: *Jill H. Larkin and Barbara Rainard* 235

Contributed Articles

- Teaching Concepts of Energy to Nigerian Children in the 7–11 Year-Old Age Range: *Andrew O. Urevbu* 255
- Recent Trends in Secondary Science Education in New Jersey: *David Sousa* 269
- The Effects of Instruction on Integrated Science Process Skill Achievement: *Michael J. Padilla, James R. Okey, and Kathryn Gerrard* 277
- The Influence of Activity-Based Elementary Science Programs on Classroom Practices: A Quantitative Synthesis: *Ted Bredderman* 289
- The Effect of Method and Format on the Responses of Subjects to a Piagetian Reasoning Problem: *John R. Staver and Ernest T. Pascarella* 305
- An Examination of Methods Used to Generate Daily Group Scores from Single-Item-per-Subject Data Collected in Intensive Time-Series Designs: *John S. Monk* 315
- Factors Related to the Decision of Men and Women to Continue Taking Science Courses in College: *George E. DeBoer* 325
- Scientific Problem Solving by Expert Systems: *Ron Good* 331

Comment and Criticism

- Thirty Studies Involving the "Scientific Attitude Inventory": What Confidence Can We Have in This Instrument?: *Dana Lewis Zeidler* 341

Issue 4, April

- An Assessment of the Validity and Discrimination of the Intensive Time-Series Design by Monitoring Learning Differences between Students with Different Cognitive Tendencies: *Carolyn H. Farnsworth and Victor J. Mayer* 345
- Attention and Curiosity in Museums: *John J. Koran, Jr., Laura Morrison, Jeffrey R. Lehman, Mary Lou Koran, and Luisa Gandara* 357
- Relationships Among Gender, Age, and Intellectual Development: *Lilian de Hernandez, Edmund A. Marek, and John W. Renner* 365
- The Effects of Question Types in Textual Reading upon Retention of Biology Concepts: *William H. Leonard and Lawrence F. Lowery* 377
- Identifying Potential "Dropouts" from College Physics Classes: *Warren Wollman and Frances Lawrenz* 385
- Validation of the Attitude toward Women in Science Scale for Early Adolescents: *Thomas Owen Erb and Walter S. Smith* 391
- Models and Procedures: Teaching for Transfer of Pendulum Knowledge: *Warren Wollman* 399
- The Acquisition of Basic Quantitative Reasoning Skills during Adolescence: Learning or Development?: *Anton E. Lawson and Jonathan M. Bealer* 417
- Toward the Development of a Children's Science Curiosity Measure: *Harold Harty and Dwight Beall* 425

Issue 5, May

- Students' Conceptions about the Vector Characteristics of Three Physics Concepts: *Jose Aguirre and Gaalen Erickson* 439
- Qualitative Research: Data Analysis Framework Generating Grounded Theory Applicable to the Crisis in Science Education: *Barbara S. Spector* 459
- Student Task Involvement in Activity Oriented Science: *Kenneth Tobin* 469
- Attitudes toward Science of Gifted and Nongifted Fifth Graders: *Harold Harty and Dwight Beall* 483
- The Effect of Changes in Item Sequence on Student Performance in a Multiple-Choice Chemistry Test: *Derek Hodson* 489
- An Evaluation of the Effect of Two Different Lengths of Inservice Training on Teacher Attitudes: *Frances P. Lawrenz* 497
- Spatial Ability and Achievement in Introductory Physics: *George J. Pallrand and Fred Seeber* 507
- Effects of Method and Format on Subjects' Responses to a Control of Variables Reasoning Problem: *John R. Staver* 517
- The Development of Formal Thought during Pretertiary Science Courses in Papua New Guinea: *Audrey Hendry Wilson and James Michael Wilson* 527
- Predictive Validity of Five Cognitive Skills Tests among Women Receiving Engineering Training: *Michele Andrisin Wittig, Sharon Hennix Sasse, and Jean Giacomi* 537

Issue 6, September

Research Forum

- Education Research Speaks—Dare We Listen?: *David P. Butts* 549

Contributed Articles

- Case Study of an Innovation Requiring Teachers to Change Roles: *Barbara S. Spector* ... 563
- Management and Organization in Science Classrooms: *Julie P. Sanford* 575
- The Development of a Group Test of Formal Operational Logic in the Content Area of Environmental Science: *Juliana T. Texley and John Norman, Jr.* 589
- Two-Year Study Relating Adolescents' Self-Concept and Gender Role Perceptions to Achievement and Attitudes toward Science: *Herbert M. Handley and Linda W. Morse* ... 599
- TCIQ: An Identification by Intensity and Frequency of "Potent" Testing Cues in Science: *William J. Kermis* 609
- Mendelian Genetics: Paradigm, Conjecture, or Research Program: *V. Oldham and W. Brouwer* 623
- Measuring Thinking with Standardized Science Tests: *Carol Faltin Morgenstern and John W. Renner* 639
- Adding Results to a Meta-Analysis: Theory and Example: *Victor L. Willson* 649
- Changing Attitudes Toward Energy Conservation: The Effect of Development Advancement on the Salience of One-Sided and Two-Sided Persuasive Communications: *Thomas R. Koballa, Jr.* 659

Comments and Criticism

- Comments on: Predicting Science Achievement: The Role of Developmental Level, Disembedding Ability, Mental Capacity, Prior Knowledge, and Beliefs: *Piet Lijnse* 669

Issue 7, October

- The Effects of an Environmental Studies Course on the Defensibility of Environmental Attitudes: *Thomas G. Kinsey and Jack H. Wheatley* 675
- Plants as Producers: A Case Study of Elementary Science Teaching: *Edward L. Smith and Charles W. Anderson* 685
- The Effect of Grouping of Laboratory Students on Selected Educational Outcomes: *Frances Lawrenz and Theodore W. Munch* 699
- Designing a Likert-Type Scale to Assess Attitude toward Energy Conservation: A Nine-Step Process: *Thomas R. Koballa, Jr.* 709
- A Study of the Relationship between Concept Emphasis in High School Biology Textbooks and Achievement Levels: *Hee-Hyung Cho and Jane Butler Kahle* 725
- Cultural Diversity and Differences in Formal Reasoning Ability: *Anton E. Lawson and Jonathan M. Bealer* 735
- The Effects of Cognitive Development and Age on Elementary Student's Science Achievement for Structured Inductive and Semi-Deductive Inquiry Strategies: *Larry D. Yore* 745
- Concerns Based Adoption Model (CBAM): Basis for an Elementary Science Methods Course: *Mark R. Malone* 755

Issue 8, November

- The Effects of Two Teaching Strategies Utilizing Manipulatives on the Development of Logical Thought: *Herbert C. Cohen* 769
- Effects of Extended Wait Time on Discourse Characteristics and Achievement in Middle School Grades: *Kenneth Tobin* 779
- Aptitude-Treatment Interaction Research in Science Education: *Mary Lou Koran and John J. Koran, Jr.* 793
- Using Propositions from Clinical Interviews as Variables to Compare Student Knowledge: *Fred N. Finley* 809
- Social Issues in High School Biology Textbooks: 1963–1983: *Dorothy B. Rosenthal* 819
- Cognitive Style and the Effects of Two Instructional Treatments on the Acquisition and Transfer of the Ability to Control Variables: A Longitudinal Study: *Barbara M. Strawitz* 833
- Analyzing Difficulties with Mole-Concept Tasks by Using Familiar Analog Tasks: *Dorothy Gabel and Robert D. Sherwood* 843
- The Relationship between Science Process Abilities of Teachers and Science Achievement of Students: An Experimental Study: *M. L. Aiello-Nicosia, R. M. Sperandeo-Mineo, and M. A. Valenza* 853

Comments and Criticism

- Comments on "The Nature of Advanced Reasoning and Science Instructions:" *Morris A. Enyeart* 859

Issue 9, December

- The Impact of a Class Visit to a Participatory Science Museum Exhibit and a Classroom Science Lesson: *Barbara K. Flexer and Minda Borun* 863
- Cooperative, Competitive, and Individualistic Science Laboratory Interaction Patterns—Effects on Students' Achievement and Acquisition of Practical Skills: *Peter A. Okebukola and Meshach B. Ogunniyi* 875
- Interaction of Learner Characteristics with Learning from Three Models of the Periodic Table: *Jeffrey R. Lehman, John J. Koran, Jr., and Mary Lou Koran* 885
- Problem Solving and Classical Genetics: Successful versus Unsuccessful Performance: *Mike U. Smith and Ron Good* 895
- Comparison of Anxiety Levels of Students in Introductory Earth Science and Geology Courses: *Mary E. Westerback, Clemencia Gonzalez, and Louis H. Primavera* 913
- The Relative Effects of Experimenter and Subject Generated Questions on Learning from Museum Case Exhibits: *Jeffrey R. Lehman and Kathleen M. Lehman* 931
- Studies on Anxiety about Teaching Science in Preservice Elementary Teachers: *Mary E. Westerback* 937

Comments and Criticism

- Further Comments on the Validity Studies of Attitude Measures in Science Education: *Marvin Bratt* 951

- Mathematical Modeling of Learning: *Peter F. W. Preece* 953
- Comments on "The Importance of Terminology in Teaching K–12 Science": *Donald R. Daugs* 957
